

# MEHUL J DHAKNE

Nagpur, Maharashtra, India  
**Phone:** +91 8421129778  
**Email:** mehuldhakne136@gmail.com  
**LinkedIn:** linkedin.com/in/mehuldhakne/  
**GitHub:** github.com/mehuldhakne

---

## Career Objective

Aspiring Electronics & Telecommunication engineer with interests in AI-integrated systems, Embedded Systems, and VLSI design. Passionate about practical innovation, technical leadership, and emerging technologies.

## Education

### **B.E. – Electronics & Telecommunication Engineering**

Government College of Engineering, Amravati (GCOEA)  
2023 – 2027 (Expected)  
Current CGPA: 7.34 / 10

### **Higher Secondary Certificate (HSC)**

Major Hemant Jakate College of Science & Commerce, Nagpur  
Percentage: 70%

### **Secondary School Certificate (SSC)**

Prerna Convent School, Nagpur  
Percentage: 93%

## Technical Skills

**Programming & Software:** C Programming, Embedded C, Basic Python, MATLAB, Git & GitHub

**Electronics & Hardware:** 8051 Microcontroller, Arduino, UART Communication, Timers & Counters, Basic Circuit Design

**Areas of Interest:** Embedded Systems, Artificial Intelligence, VLSI & Verilog, Industrial Automation, IoT Systems

## Projects

### **Smart Industrial Monitoring System**

Designed a basic monitoring system using sensors and microcontroller concepts for tracking industrial parameters such as temperature, voltage, or equipment status. Explored automation and real-time monitoring techniques for industrial applications.

**GIT:**<https://github.com/mehuldhakne/Operator-Skill-detector-system>

### **UART Protocol Simulation in Verilog | ZOHO Academic Project**

Developed and simulated a UART transmitter and receiver system using Verilog and Vivado. Validated data transmission logic through waveform analysis and custom testbenches.

**GIT:**<https://github.com/mehuldhakne/UART-Interface-Verilog>

**AI-Accelerated 5G RAN System using NVIDIA Technologies**

Developed an AI-based 5G RAN (Radio Access Network) project using NVIDIA accelerated computing concepts. Focused on integrating AI-driven optimization and modern wireless communication concepts with practical implementation

**GIT:** <https://github.com/mehuldhakne/AI-powered-5G-network-scheduler>

**Astronomy & Technical Outreach Activities**

Organized technical workshops and educational events related to science and technology.

**Leadership & Activities****Technical Workshops & Community Learning**

Conducted beginner-friendly sessions related to web development and AI learning.

**Astronomy & Astrophysics Society – GCOEA**

Managed technical events, workshops, and telescope demonstration activities.

**Certifications & Learning**

- Currently Learning Verilog & VLSI Design
- Verilog HDL Course
- Frontend Web Development (HTML, CSS, JavaScript)

**Strengths**

- Technical Problem Solving
- Rapid Adaptability
- Collaborative Development
- Technical Communication
- Initiative-Driven Learning
